

Principle sketches/suggestions for lifting and support framework solution. Other solutions are welcome!
Lightning trusses, chain hoists and vertical support, based on suppliers recommendations, will be supplied by NRK . At the moment we are planning 2 pcs screens approx 3x8m, but there is still a discussion regarding sizes and quantity within the same squaremeters...

We are planning to store the screens underneath the grid in our studio. But there will be possible to lower them, and assemble a wheelset so we can use the screens in different positions
