

Example of statistics/reports that we want extracted from the FIT software solution. "User" is the service provider (therapist etc.)
"Service location" is the predefined organisational unit and can contain various departments.

It should be possible to run the report with filter on Service Location and (if it exists) - department.
Cases or clients with Tag "testbruker" should never be included.
Deleted clinicians/administrators etc should be excluded

Table: Your department

Header: <Service Location>, <department>

		Active	Closed - planned	Closed - unplanned
Clients	Adults			
	Adolescents (13-18)			
	Children (6-12)			
Collateral Raters				
Cases				
Cases with more than 0 surveys filled in				
Sessions				
Average sessions per case				
Average treatment length (weeks)				
Dropout rate (unilateral termination without effect in the green zone)				
Clients				
Average intake ORS	Adults			
	Adolescents (13-18)			
	Children (6-12)			
Average intake SRS	Adults			

Adolescents (13-18)
Children (6-12)

Average Raw Change
% Reaching Target
% No Change
% Reaching Negative Zone
Effect Size
Relative Effect Size
Severity adjusted Effect Size

Collateral raters

Average intake ORS
Average intake SRS
Average Raw Change
Percentage Reaching Target
Effect Size
Relative Effect Size
Severity adjusted Effect Size

(end of table)

Table: User statistics - simple

UserName (either e-mail address or full name)
Last login date
No of cases
Open cases
Closed cases -planned
Closed cases - unplanned
No of clients
No of collateral raters

(end of table)

Table: User statistic - extended

UserName (either e-mail address or full name)
Last login date

No of cases

Open cases

Closed cases -planned

Closed cases - unplanned

No of clients

No of collateral raters

No of sessions

Average no of sessions per case

Average intake ORS

Average intake SRS

Average treatment length (in months)

Dropout rate

(unilateral termination without effect in the green zone)
